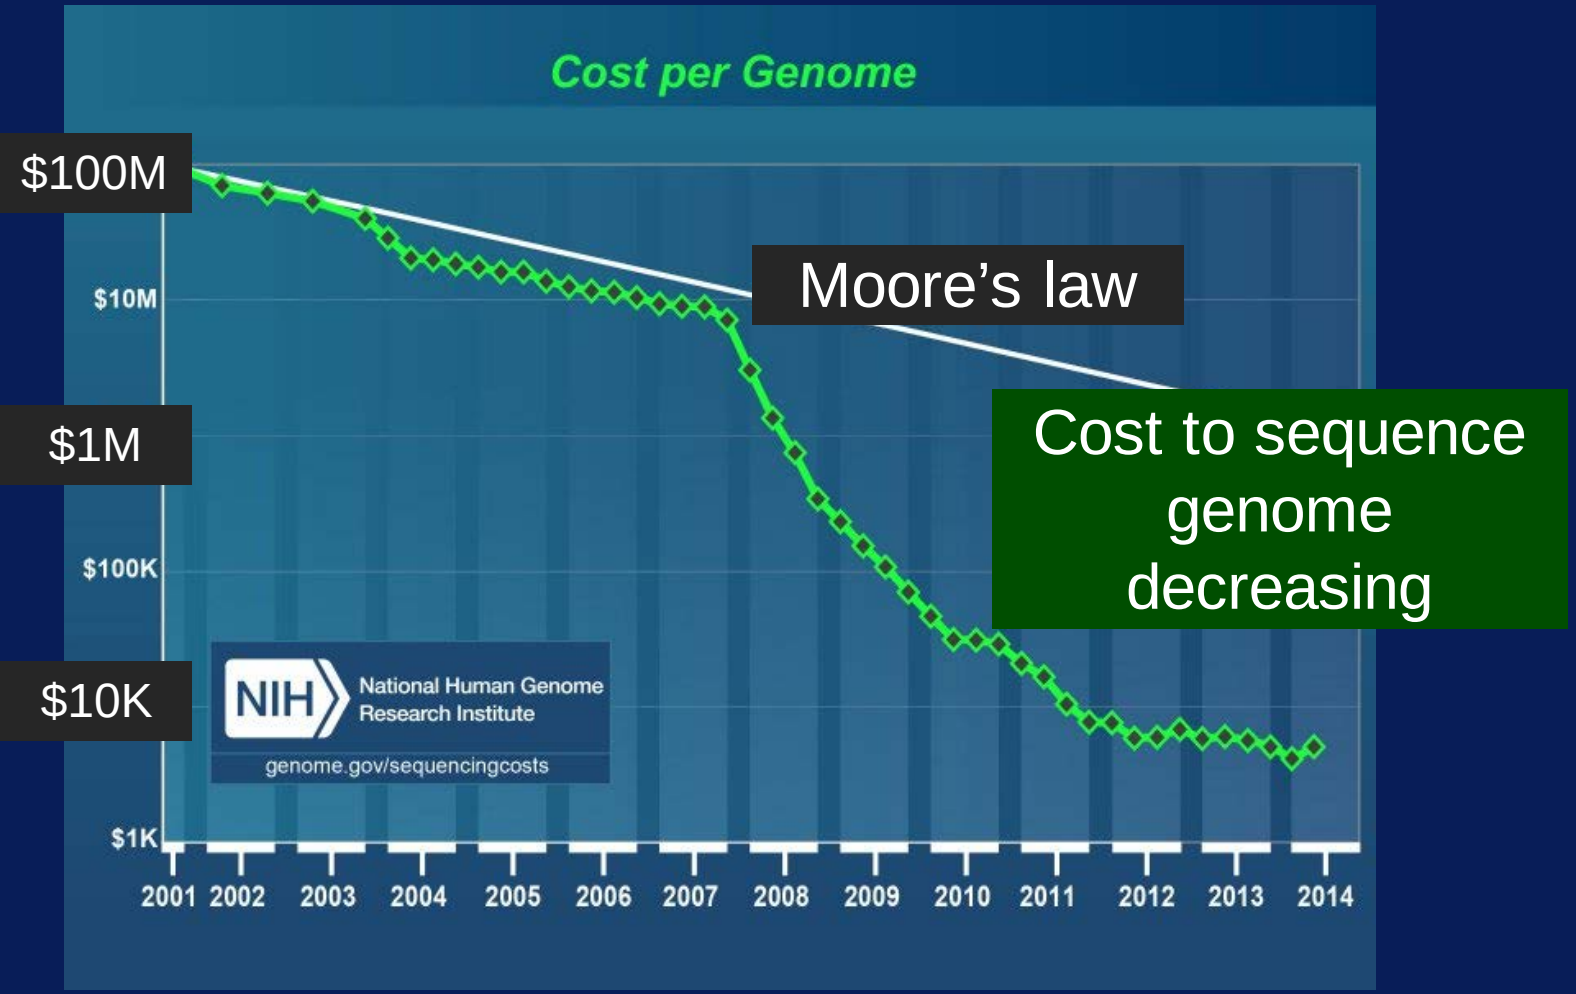
Saving Lives with Big Data: Precision Medicine and Health Informatics

After this video you will be able to..

- Give examples of sensor, organizational, and people-generated data used in precision medicine

- Explain to a friend why the integration of different streams of data is critical to advancing healthcare

Why is this important now?



Cost per Genome
$100M
$10M
$1M
$100K
$10K
$1K
2001 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014
